## 2006-2007 Jetta, Rabbit, GTI, Eos, and B6 Passat Sedan/Wagon, Radiator Fan Complaints

For radiator fan operation complaints, it is important to **NOT** replace the slave fan unnecessarily. If both fans are inoperative, perform an Output Diagnostic check in the ECM to activate the fan circuit. If neither fan activates, **ONLY** replace the master fan and retest. If both fans now activate, the repair is finished; **DO NOT** replace the slave fan. If the slave fan is still not activating, continue diagnosing the slave fan circuitry before replacing it.
